🌐 [Wildan Yazid Ziddan](#)

Fullstack & Game Developer experienced in building scalable applications, backend systems, and interactive logic. Skilled in Laravel, Java, React Native, and .NET, with a strong technical focus on database design, API integration, and algorithmic problem-solving. Proven technical capability in developing functional software solutions and applying Machine Learning methodologies, backed by international research recognition and practical programming mentorship.

EDUCATION

Astra Polytechnic - Jawa Barat, Indonesia

Aug 2024 - Now

Associate's degree - Informatics Management

- Current GPA: 3.35

SMK 1 Perguruan Cikini

Jul 2021 - May 2024

Software Engineering

- Extracurricular Activities : Taekwondo & Drumband

WORK EXPERIENCE

LookMedia - Jakarta

Dec 2022 - Mar 2023

Game Developer - Internship

- Designed and developed an interactive onboarding gamification feature to help introduce and connect internal company staff.
- Built gameplay mechanics and interactive UI elements to enhance employee engagement and team familiarity.
- Collaborated with internal teams to gather staff profile assets and integrate multimedia content into the game environment.

ORGANIZATION EXPERIENCE

Informatics Management Student Association of Astra Polytechnic

2025 - 2026

Staff of the Education Department (Programming Division)

- Facilitated programming study groups and peer-mentoring sessions to enhance students' coding proficiency.
- Assisted in designing curriculum modules and hands-on coding materials focused on core programming foundations.
- Collaborated with department members to organize academic support initiatives.

Taekwondo Club SMK 1 Perguruan Cikini

2021 - 2023

Treasurer

- Managed financial operations, including the collection of monthly membership dues.
- Maintained meticulous financial records and provided transparent budget reports for club leadership.
- Coordinated funds for equipment procurement, and team event logistics.

ACTIVITY

Instructor – Hello Project 2025

Jan 2026

- Delivered technical sessions covering database schema design and project architecture.
- Guided students through hands-on development workflows to build functional application features.
- Mentored participants on project showcases, software testing, and presentation techniques.

Project Leader – UI/UX Training 2025

Jun 2025

- Led and coordinated an organizing committee to successfully execute a multi-session UI/UX training program.
- Collaborated with industry/academic instructors to structure comprehensive modules on UI/UX fundamentals, wireframing, and interactive prototyping.
- Managed event budgeting, scheduling, and risk mitigation to ensure seamless event delivery across all workshop dates.

DEVELOPMENT PROJECT

i-Trems Mobile Application – PT Akal Budi Lestari

Jun 2026 - Present

Project Leader | Fullstack Developer & System Analyst

React Native, Supabase, Typescript, PostgreSQL, Git, Draw.io

- Led the end-to-end development of a cross-platform mobile application utilizing React Native and TypeScript, integrated with Supabase for real-time tracking, database management, and authentication to streamline operational monitoring and field data reporting.

MelanoLens Web Application - Politeknik Astra

May 2026 - Present

Web Division Leader | Fullstack Developer, UI/UX Designer, & System Analyst

Collaborative Project with Lecture, Muhammad Ridha, S.T., M.Kom.

NextJs, Typescript, Python, Figma, Draw.io

- Led the Web Development Division in developing a web application for early melanoma detection, collaborating with the AI Development Division and Muhammad Ridha, S.T., M.Kom.
- Designed and developed the web application using Next.js and TypeScript, integrating the frontend with a Python-based backend and AI components.
- Designed and implemented application workflows, system architecture, and database structures based on project requirements.
- Managed application deployment and backend infrastructure using Railway and Supabase.
- Designed UI/UX prototypes and system diagrams using Figma and Draw.io.

Lembaga Penelitian & Pengabdian kepada Masyarakat Website – Politeknik Astra

May 2026

Project Leader | Fullstack Developer & System Analyst

HTML, CSS, JavaScript, React JS, SQL Server, ASP.NET, Visual Studio, VS Code, Github, Draw.io

- Led the development of the Research module for managing research activities at Politeknik Astra.
- Designed system architecture, database structure, and application workflows based on user and organizational requirements.
- Developed both frontend and backend features using React.js, ASP.NET, and SQL Server.
- Collaborated with team members throughout the development lifecycle, including analysis, implementation, testing, and version control.

Sistem Informasi Akademik Website – Politeknik Astra

Dec 2025 – Feb 2026

Project Leader | Fullstack Developer & System Analyst

HTML, CSS, JavaScript, React JS, SQL Server, ASP.NET, Visual Studio, VS Code, Github, Draw.io

- Led the development of the Dashboard module for multiple user roles within the Academic Information System.
- Analyzed role-specific requirements and designed dashboard workflows and interfaces tailored to each user role.
- Developed frontend and backend functionality using React.js, ASP.NET, and SQL Server.
- Designed system flow and database-related structures using Draw.io and collaborated with team members throughout the development process.

Heart of The Wildlands Desktop Game – Politeknik Astra

Jun 2025

Project Leader | Fullstack Developer, UI/UX Designer & System Analyst

Java, Java FX, Github, Draw.io

- Led the development of a 2D desktop game using Java and JavaFX, from system analysis and game design to implementation and testing.
- Designed gameplay flow, user interface, and player interactions to create an engaging and intuitive gaming experience.
- Implemented core game mechanics, including player movement, interactions, game states, and in-game systems.
- Designed system and game flow diagrams using Draw.io and collaborated with team members throughout the development process.

Karaoke Poprock Desktop App(Karaoke Management System) – Politeknik Astra

May 2025

Project Leader | Fullstack Developer, UI/UX Designer & System Analyst

Java, Java FX, Jasper Report, SQL Server, Github, Figma, Draw.io

- Led the development of a desktop-based Karaoke Management System to support karaoke room, customer, transaction, and operational management.
- Analyzed system requirements and designed application workflows and database structures based on the identified business processes.
- Designed the application interface and user experience using JavaFX and implemented core application functionality using Java.
- Developed database integration and data management functionality using SQL Server.
- Collaborated with team members throughout the analysis, design, development, and testing phases.

Sahabat Medika Pharmacy Management System Console App – Politeknik Astra

Dec 2024

Project Leader | Fullstack Developer & System Analyst

C, Draw.io

- Led the development of a console-based Pharmacy Management System to manage pharmacy operations and data.
- Analyzed business requirements and designed system workflows based on pharmacy management processes.
- Implemented core application logic and data management features using object-oriented programming principles.
- Designed the system structure and database-related workflows to support efficient data processing and management.
- Collaborated with team members throughout the analysis, development, testing, and documentation phases.

Library Management System Website – SMK 1 Perguruan Cikini

Apr 2024

Individual Development | Frontend Developer, UI/UX Designer, & System Analyst

HTML, CSS, Javascript, Figma, Draw.io

- Developed a web-based Library Management System as part of an LSP Certification Examination.
- Analyzed system requirements and designed application workflows based on identified library management processes.
- Designed the user interface and user experience using Figma and translated the designs into a functional frontend using HTML, CSS, and JavaScript.
- Created system flow diagrams and documentation using Draw.io.
- Independently handled the analysis, UI/UX design, frontend development, and testing of the application.

Augmented Reality 3D Visualization App – SMK 1 Perguruan Cikini

Mar 2024

Individual Development | AR Developer

Unity, Vuforia engine

- Developed a marker-based Augmented Reality application that detects images and displays corresponding 3D models in real-world environments.
- Implemented image recognition and 3D model rendering using Vuforia Engine and Unity.
- Designed and developed the application independently, from implementation to *testing*.

ACHIEVEMENT

The Best Paper Award – 1st ICDSG 2025

November 28, 2025

Organized by INABIMS Center, Institut Teknologi Nasional Malang (International)

CERTIFICATIONS

Introduction to Financial Literacy, Dicoding 2026

Mikrotik Certified Network Associate, 2026

EF SET English Certificate, EF 2025

Junior Programmer Certification, BNSP 2024

Belajar Dasar Google Cloud, Dicoding 2022

Cloud Practitioner Essentials, Dicoding 2022

Belajar Dasar Pemrograman Web, Dicoding 2022

SKILLS AND INTERESTS

Web & Software Development

Experienced in developing web and desktop applications using **JavaScript, Java, C#, PHP, Python**, and **C**, with expertise in **React.js, React Native, ASP.NET, Node.js, Python backend development**, and **JavaFX**. Proficient in full-stack development, including frontend development, backend and **REST API development, database management**, and application logic using **SQL Server, SQL**, and **PostgreSQL**.

Game Development

Experienced in developing **2D desktop and mobile games** using **Java, JavaFX, Unity, and C#**, including gameplay mechanics, player movement, interactions, game flow, and user interfaces. Experienced in developing interactive games for both desktop and Android platforms, with a focus on gameplay logic and user interaction.

UI/UX Design

Experienced in designing user interfaces and user experiences using **Figma**, from wireframing and prototyping to translating designs into functional applications. Focused on creating intuitive, user-centered, and consistent interfaces across web, desktop, and mobile applications.

System Analysis & Project Management

Capable of conducting **requirements analysis, system modeling, database and system design, and application workflow planning**. Experienced as a **Project Leader** in multiple software development projects, coordinating team members throughout analysis, design, development, testing, and documentation.

System Analysis & Project Management

Capable of conducting **requirements analysis, system modeling, database and system design, and application workflow planning**. Experienced as a **Project Leader** in multiple software development projects, coordinating team members throughout analysis, design, development, testing, and documentation.

Tools & Technologies

Visual Studio, Visual Studio Code, CLion, IntelliJ IDEA, SQL Server Management Studio, Git/GitHub, Figma, Draw.io, Scene Builder, Unity, Vuforia Engine, Supabase, Vercel, Railway, and Microsoft Office.

Interests

Software Engineering, Full-Stack Development, Web & Desktop Application Development, Mobile Development, Backend & API Development, UI/UX Design, System Analysis, Software Architecture, Game Development, Augmented Reality (AR), and Cloud Deployment.
